

開發癌症精準醫療之生物標記及 體外檢驗試劑原型

主要領域

精準醫療/癌症治療

■ 產品/技術簡介

- 癌症深度蛋白基因體及臨床資訊大數據庫
- 國際標準化之深度蛋白基因體整合分析平台
- 癌症標記蛋白質譜檢測技術

■ 應用: 疾病檢測、生物標記篩檢與開發

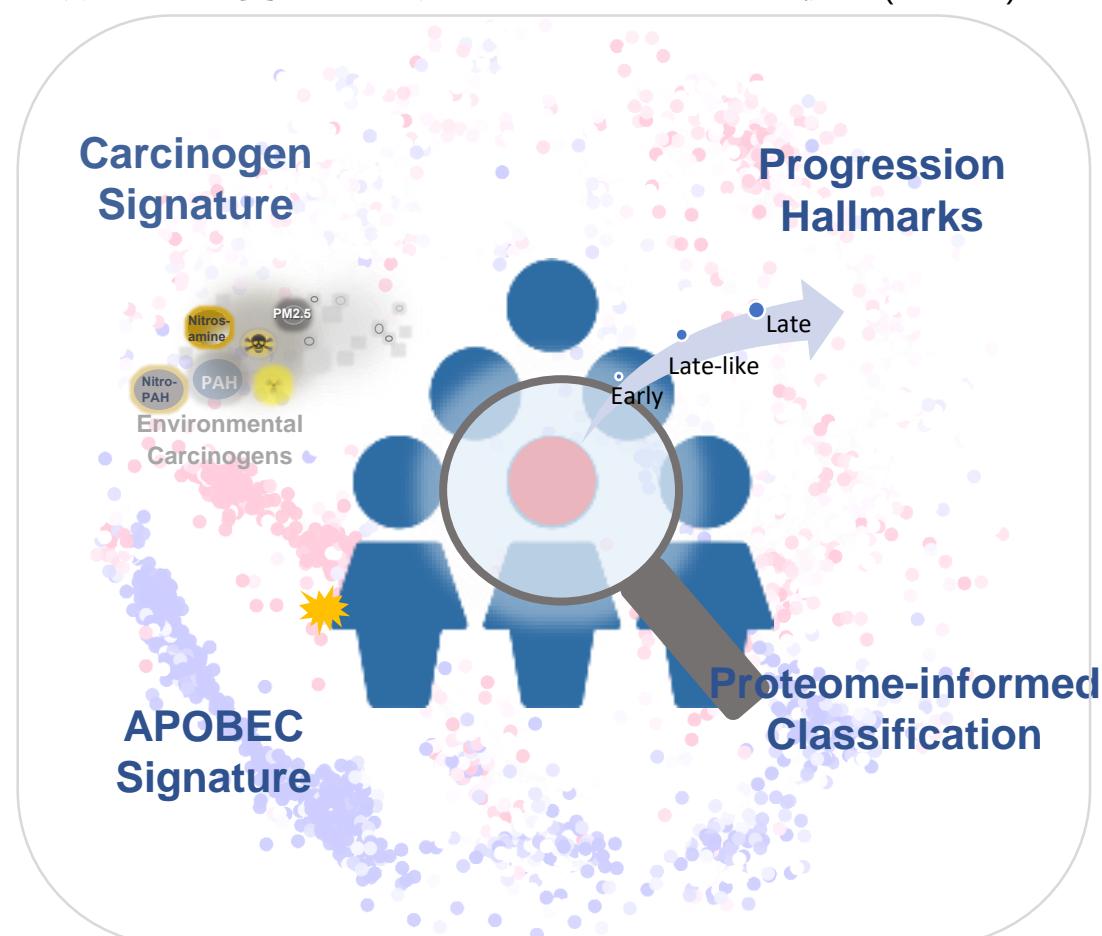

- 早期肺癌高復發預測套組與免疫療法伴隨式診斷LDTS的開發與臨床驗證
- 肺癌早期篩檢預測
- Tg甲狀腺質譜檢測

■ 優勢

- 東亞特色之癌症深度蛋白基因體大數據庫

■ 專利現況

- 早期肺腺癌之蛋白體分期診斷方法 (申請中)
- 以體細胞突變印記方法或試劑進行早期肺腺癌檢測 (申請中)

Development of Biomarkers and In-vitro Testing Prototypes for Cancer Precision Medicine

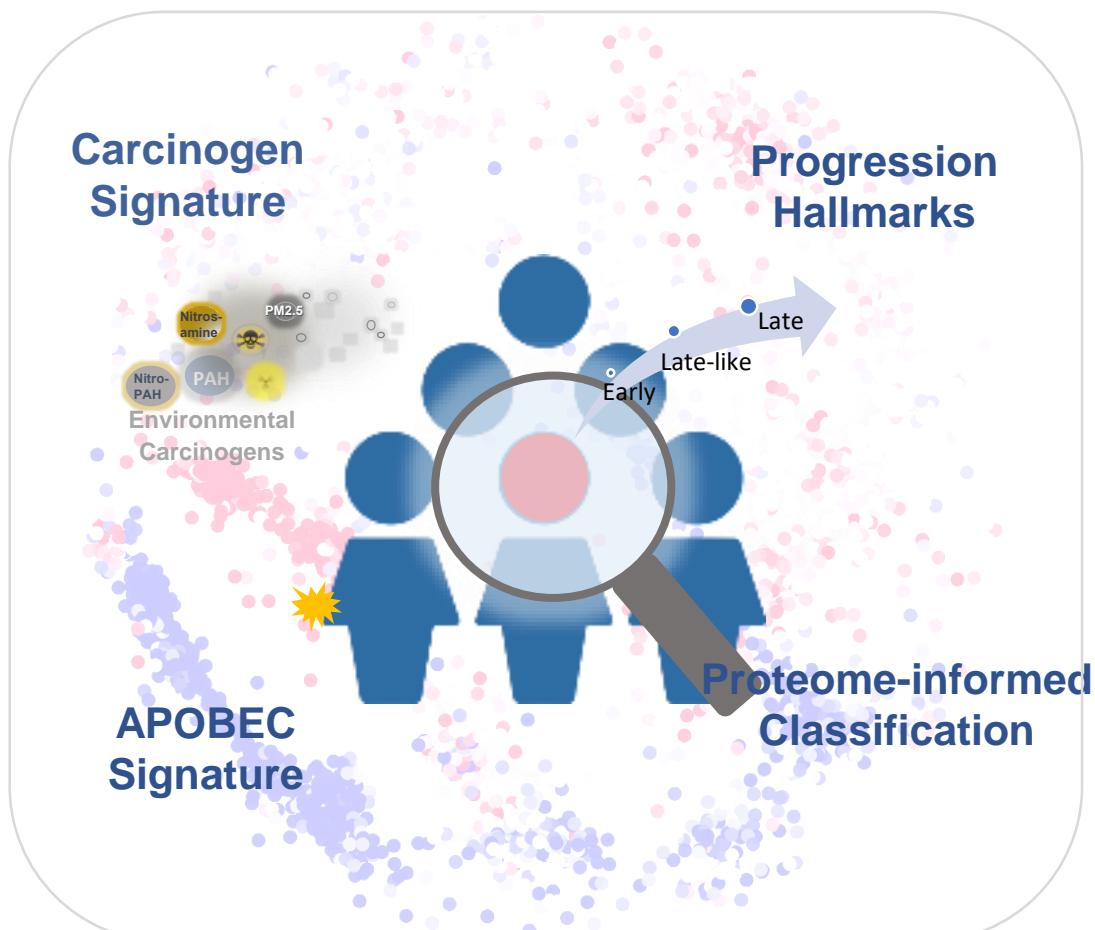

Research Area Precision Medicine/ Biomarker Discovery

- **Technical statement**
 - High quality proteogenomic big data and clinical data for cancers
 - Internationally standardized platform of deep proteogenomic analysis
 - Mass spectrometry-based detection assay for cancer biomarker

- **Applications:** *Disease detection, biomarker screening and development*
 - Development and clinical validation of prediction kits for highly recurrent early stage lung cancer patients and immunotherapy-companion diagnosis with LDTs
 - Early screening prediction of lung cancer
 - Mass spectrometry detection of thyroglobulin (Tg)

- **Advantages**
 - Comprehensive cancer proteogenomic landscape for patients of East Asia

- **Patent status**
 - Proteomic classification for early stage lung adenocarcinoma (*In Application*)
 - Somatic mutational signatures for early detection of lung adenocarcinoma (*In Application*)
