

發展對抗癌症的人源抗體

主要領域 癌症免疫治療

■ 產品/技術簡介

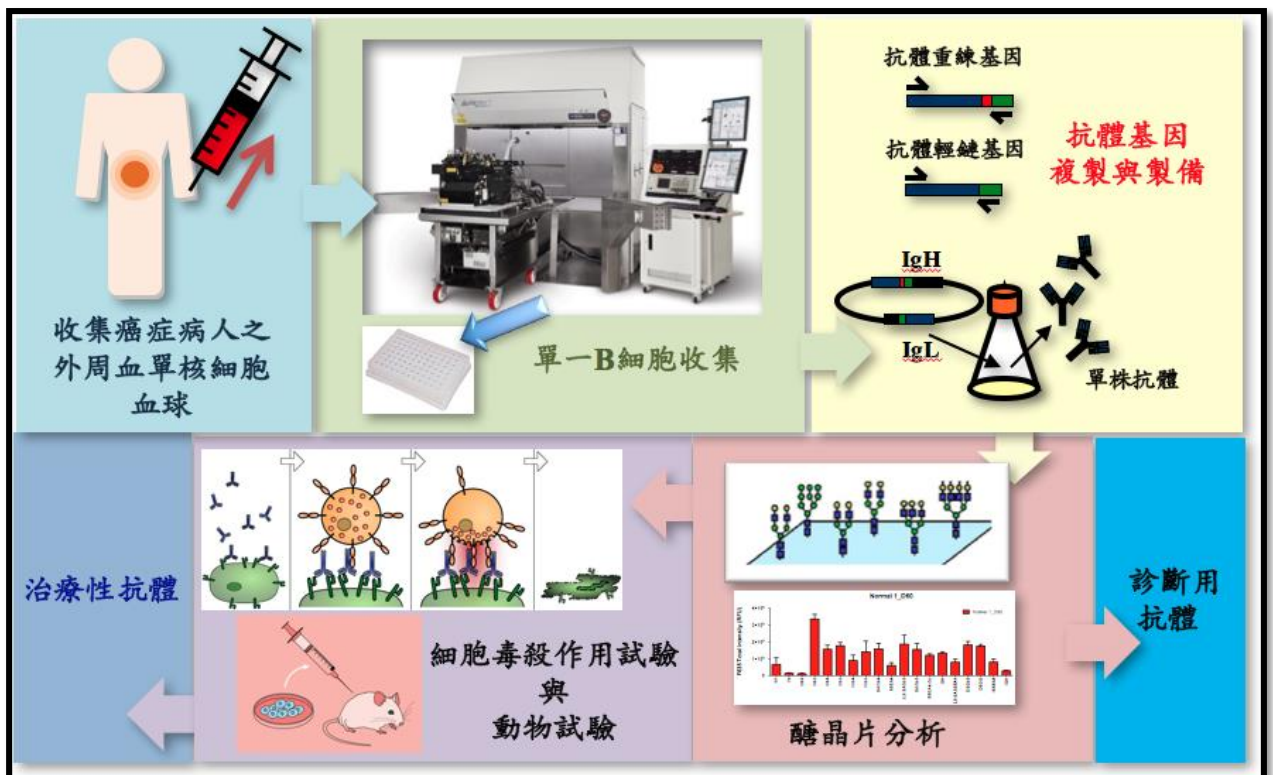

- 利用單一B細胞抗體製備平台篩選出對於癌症特殊表現的醣體抗原有特殊辨識能力之單株抗體

■ 應用

- 篩選出能辨識癌症所表現的醣體抗原決定位之單株抗體
- 診斷用之專一性癌症單株抗體
- 治療用之專一性癌症單株抗體

■ 優勢

- 利用此平台能篩選出特殊且專一辨識醣體的單株抗體

Development of Human Monoclonal Antibody Targeting Cancer Glycans

Research Area **Cancer Immunology**

■ Technical statement

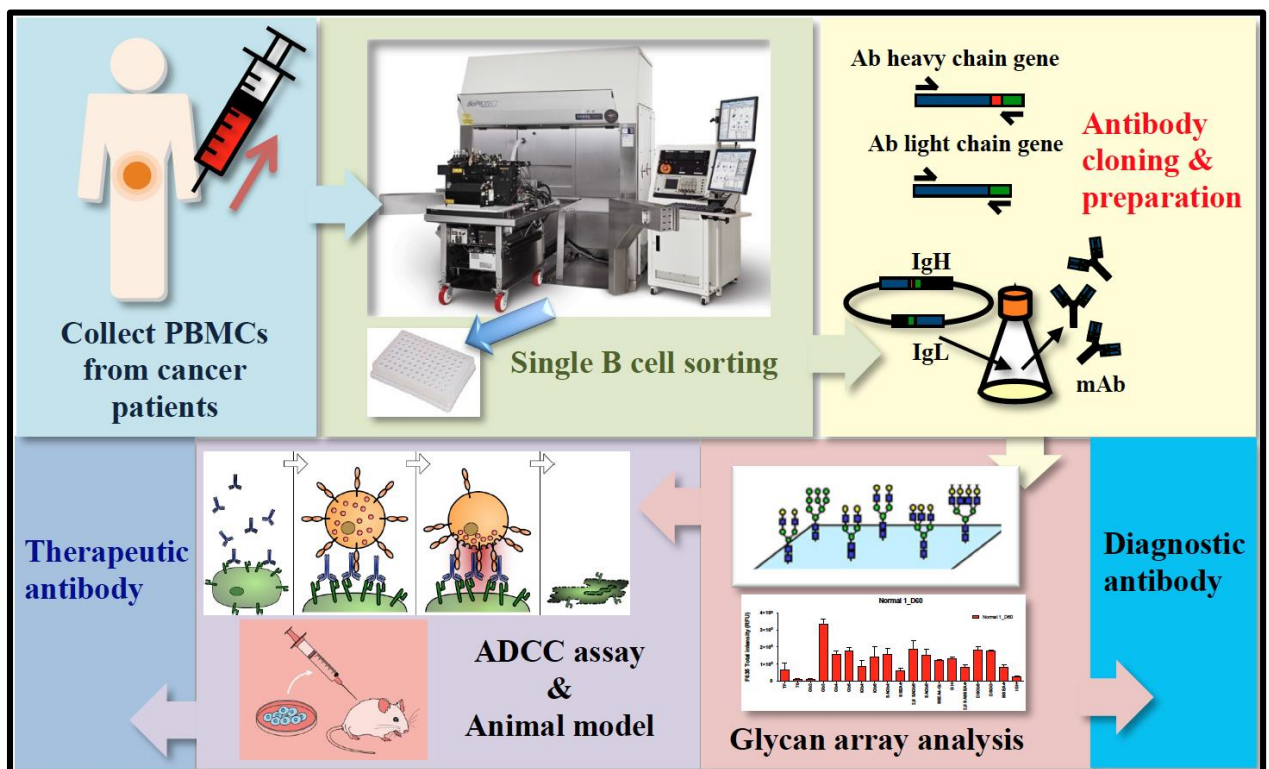

- Using single B cell-platform to select human monoclonal antibody recognizing tumor specific glycan antigens

■ Applications

- Isolation of monoclonal antibody recognizing cancer specific glycan epitopes
- Cancer specific monoclonal antibody for diagnosis
- Cancer specific monoclonal antibody for potential treatment

■ Advantages

- Unique glycan specific monoclonal antibodies
